

## Announcement to change our accessories for PX-1 V3(Q) and PX-1C V3(Q)

Dear Sir or Madam,

We would like to inform you that in the future our products "PX-1 V3 single packed" and "PX-1C single packed" will no longer be equipped with screws and dowels as an alternative mounting material to our certified screws and dowels.

The experience of recent years has shown that different surfaces require different dowels and screws when using a drill mounting as an alternative to the certified adhesive mounting.

The change will take effect in November 2021.

In the future, we will only include the mounting material "Mounting material for installation according to Q-label" according to vfdb 14/01(Q) and EN 14604:2005/AC:2008 in every sales package.

For a possible drill mounting, the enclosed magnetic pad will still be provided with a pre-drilled hole.

Furthermore, we would like to point out again that our PyrexX products are no longer subject to TÜV NORD certification.

Therefore, we have removed the LOGO "TÜV NORD" as well as the references to the certification in all our printed materials (sales packaging, user manuals, technical data sheets as well as product brochures) after the changeover phase as of September 2020.

Please take these changes into account for your future orders and adjust documentations in your EDP systems or on your distributor portals if necessary.

If you have any questions regarding these changes, please do not hesitate to contact us.

Your PyrexX GmbH
